

## Empower your Sharepoint with tools from DataAssist

Tools to get more out of Sharepoint and  
know what is in YOUR Sharepoint

 Microsoft®  
**Office SharePoint®**  
Server 2007

# DataAssist e.K.

- Founded in 1991
- Located in Berlin, Germany (formerly Munich, Germany)
- Strong expertise in Sharepoint 2003 since the initial release
- Many consultancy and implementation projects worldwide at customers from mid-size to multi-national customers
- Consulting partner for Microsoft Visio for Microsoft Corp since 1996 (1996: Visio Corp, since 2000 as Microsoft corp)
- Strong visualisation knowledge and expertise

# Empower your sharepoint experience

- Sharepoint is a great platform
- You can store literally all that is necessary to make your team more productive and enhance communication
- Different functions and functionalities help you to empower your team and optimize the flow of communication

## **BUT**

- Do you know how your portal REALLY looks like ?
- Do you know how your workflows look alike ?
- Do you know how to help your users to plan and document their workflows ?
- Wouldnt it be great to give your users the possibility to use Visio locally but work on files in the portal ?

# TOOLS TO EMPOWER YOUR SHAREPOINT

# NetDoc for Sharepoint

Document your sharepoint installation

# NetDoc for Sharepoint

- A member of the NetDoc product family
- Provides even remote documentation facilities
- Visualizes the real structure of your sharepoint installation in Visio diagrams
- Marks critical factors in Visio through DataGraphics (Visio 2007 only)
- Sharepoint Platform support :
  - Windows Sharepoint Services (2.0 and 3.0)
  - Microsoft Sharepoint Portal Server 2003
  - Microsoft Office Sharepoint Server 2007
- Data is stored in custom properties - > all vital information is in your shapes - > easy report creation
- Each shape contains a hyperlink to the corresponding site in Sharepoint

# Codename „Visio workflow designer“

- Cooperation between DataAssist and maguro:agentur Berlin
- Tool for the documentation of workflows
- REAL „reverse engineering“ of workflows into Visio diagrams
- REAL „forward engineering“ of workflows into Sharepoint
- So the real roundtrip is there
  1. Import from Sharepoint into Microsoft Visio
  2. Modify in Visio
  3. Export to Sharepoint from Microsoft Visio

# visPortal: Embed Microsoft Visio in your Sharepoint Portal

- visPortal is a native Sharepoint Webpart
- It encapsulates the Microsoft Visio drawing control in an easy to use webpart solution
- Your users work INSIDE of Sharepoint with Visio diagrams
- The webpart switches between the Drawing control ActiveX and the Visio Viewer ActiveX either automatically or through configuration
- Your Visio solutions and diagrams stay at the safest place – the portal
- The users get the functions you want to give them
- Nothing gets lost, no unwanted „children“ of your files
- Supports Visio 2003 and 2007, Sharepoint 2003 and 2007 (WSS and Server)
